

Homework #9Due **Monday, October 6** in Gradescope by **11:59 pm ET**

- **WATCH** Video 10: Conformal Mappings
 - **READ** Sections II.6 and II.7 of Gamelin
 - **WRITE AND SUBMIT** solutions to the problems in this handout
-

Problem 1. (10 points) II.6, #5. Let $0 < B < \pi$. Find a conformal map of the wedge $\{-B < \text{Arg } z < B\}$ onto the right half-plane $\{\text{Re } w > 0\}$. (And of course, verify/prove all your claims.)

[Note: The point $z = 0$ does not belong to the wedge $\{-B < \text{Arg } z < B\}$, since $\text{Arg } 0$ is undefined.]

Problem 2. (10 points) II.7, #1(c). Find the fractional linear transformation $f(z) = (az + b)/(cz + d)$ such that

$$f(\infty) = 0, \quad f(1 + i) = 1, \quad f(2) = \infty$$

Problem 3. (12 points) II.7, #1(d). Find the fractional linear transformation $f(z) = (az + b)/(cz + d)$ such that

$$f(-2) = 1 - 2i, \quad f(i) = 0, \quad f(2) = 1 + 2i$$

Problem 4. (10 points) II.7, #1(f). Find the fractional linear transformation $f(z) = (az + b)/(cz + d)$ such that

$$f(0) = 0, \quad f(\infty) = 1, \quad f(i) = \infty$$

Problem 5. (20 points) II.7, #3. Let $f(z) = (az + b)/(cz + d)$ be the fractional linear transformation such that $f(1) = i$, $f(0) = 1 + i$, and $f(-1) = 1$.

Determine the image of the following three sets under f :

- the unit circle $|z| = 1$.
- the open unit disk $|z| < 1$.
- the imaginary axis $\text{Re}(z) = 0$.

Illustrate with a single sketch showing all three images. (And of course, as on every HW problem, (briefly) explain your reasoning.)

Optional Challenge:

II.7, #6: Let $L \subseteq \mathbb{C}$ be a straight line in the plane, and let $f(z) = 1/z$. Prove that the image of L under f is either a straight line (if L passes through the origin) or a circle (otherwise).

[Note: In this problem, consider a straight line to contain the point ∞ .]

Questions? You can ask in class or in:

My (Drop-In) Office Hours (SMUD 406):

Mondays 2:00–3:30pm

Tuesdays 1:45–3:15pm

Fridays 1:00–2:00pm

or by appointment.

Math Fellow Drop-in Hours (Katya Havryshchuk, SMUD 208):

Mondays ~~7:30–9:00pm~~ **Cancelled Monday, October 6**

Wednesdays 7:30–9:00pm (in SMUD 208 as usual)

This week only: Thursday, Oct 9 7:30–9:00pm SMUD 014

Also, you may email me any time at rlbenedetto@amherst.edu
